

## Holtec Asia's Feedwater Heaters

Holtec Asia provides comprehensive utility feedwater heater solutions to the power generation, chemical and petrochemical industries. Holtec Asia's feedwater heaters are designed and fabricated to the highest standards of reliability and quality for power plants ranging from 10MW to 1500MW.

A wide variety of configurations are offered such as horizontal, vertical, channel up, channel down, one zone, two zones, three zones, duplex or combinations best suited to meet our clients' needs. High pressure heaters channel closures can be cup forged with bolted covers, pressure seals, breech locks or hemi-head/manways. In replacement applications, Holtec Asia offers complete heaters, tube bundles, parts or services as required.

Proper distribution of steam

Steady condensate levels

Efficient and effective venting

Low pressure drop after superheating

Prevents flow induced vibration

Flawless zone boundary welds

No flashing in subcooling zone

Dry walls after superheating

Steady longitudinal flow

Minimizes thermal stresses
